

Exam rules

Time and place: 06.02.2023, 10:00-12:00, room 33 C-4

13.02.2023, 10:00 -12:00, room 33 C-4 (2nd chance if necessary)

Materials: any own written material is allowed. Fair use of tablets etc. in flight mode allowed (but not recommended)

Points: 6 questions, each graded 0-2 points.

Homework assignments are graded higher: 0-3 points so the total number of points you may get from the lecture is $2*3+6*2=18$

It will be rescaled: $\text{final_points} := \text{points} * (50/18)$

$\text{result} := \text{final_points} + (\text{points-from-drKubiak})$

the standard grading is:

passed: 40 points and more

[40,50) points : 3.0

[50,60) points : 3.5

[60,70) points : 4.0

[70,80) points : 4.5

[80,100] points : 5.0

For surprisingly clever answers: 5.5

Note: The grading thresholds can be adjusted (downwards) according to any unexpected difficulties in the questions.
